## Rapport d'examen et de traitement, 23/05/2022

**Vétérinaire** Guillaume NIGER  
**Patient** Pour le cheval N21 JE T'AIME LANE  
**Propriétaire** BRULANG STEIN INGE  
L11699A  
**Anamnèse** X-RAYS lecture of images taken in March 2022.

### Examen

#### *Orthopédique*

#### X-RAYS

Left Front foot LM: normal  
Right Front foot LM: normal  
Left front fetlock LM and DP: normal  
Right front Fetlock LM and DP: normal  
Left carpus LM and DP: normal  
Right carpus LM and DP: normal  
Left hind fetlock LM and DP: very small medio-plantar ostéochondral fragment  
Right hind fetlock LM and DP: normal.  
Left hock LM and DP: normal.  
Right hock LM and DP: Osteolytic linear image in the calcaneus.  
Left stifle LM and Cau-Cra: normal  
Right stifle LM and Cau-Cra: normal

#### CONCLUSION

Good radiological record without any significant lesion. Good prognosis for the sport.

The osteochondral fragment of the left fetlock is very small and the prognosis is good without treatment.

The osteolytic line in the calcaneus is probably an old bone scar . The prognosis is good without treatment.
