

Hard Rock (577050)

Hingst, Född 24-02-2022

Operation 14-02-2023: Fetlock joint arthroscopy LH (Kotled VB)

Fetlock LH (Kotled VB): Routine approach to the plantar medial aspect of the joint. Very good visualisation achieved, however no fragment located in the joint. Radiographs taken during surgery confirmed that there was a very abaxial fragment, however this is likely to be extra-articular. Normal cartilage in the remainder of the joint.

The prognosis is good and the operation is not expected to affect the performance of the horse in the future.
