

Imperatrix (590947)

Sto, Född 19-04-2023

Operation 09-02-2024: Tarsocrural joint (TCJ) arthroscopy (Hasled), and bilateral hindlimb fetlock joint (Kotled) arthroscopy.

TCJ RH (Hasled HB): small fragment distal lateral trochlear ridge, fragment removed and subchondral bone curetted. Medial malleolus evaluated, normal cartilage, no fragment. Normal cartilage in the remainder of the joint.

Fetlock LH (Kotled VB): Small plantar osteochondral fragment (POF) removed from the proximal-medial P1. Normal cartilage in the remainder of the joint.

Fetlock RH (Kotled HB): Small fragments removed from the axial distal border of the lateral sesamoid bone. Normal cartilage in the remainder of the joint

The prognosis is good and the operation is not expected to affect the performance of the horse in the future.
