Operation 12-02-2025: LH Tarsocrural joint (TCJ) arthroscopy (Hasled), OCD medial malleolus the Tibia LH (VB) and sequester removal 3rd metatarsus LH.

- TCJ LH (Hasled VB): Fragment removed from the medial malleolus of the tibia and subchondral bone curetted. Normal cartilage in the remainder of the joint.
- Sequester removal: A sequester on the dorsal aspect of the 3rd metatarsal bone was removed and the involucrum curetted. Removal of the sequester confirmed by intra-operative radiographs.

The prognosis is good, and the operation is not expected to affect the performance of the horse in the future.
